DDA SUBJECT FILE COPY

OTE 86-6501

MEMORANDUM FOR: Chairman, Committee on Imagery Collection and Exploitation

VIA: Deputy Director for Administration

FROM: 25X1
Director of Training and Education

SUBJECT: Increase in Requirement for CAMS P/S Training

REFERENCE: DCI-ICS-2265-86, dated 8 April 1986

1. In response to your request for additional CAMS courses over the next 12 to 18 months, we propose a schedule for 11 runnings in FY 1987 and an additional running for DIA in August 1986 (see attachment).   25X1

2. To meet this increased course schedule, additional personnel will be required. Presently, we provide six scheduled runnings of the CAMS course with two instructors and one training assistant. Our estimate is that we will need another instructor and a workshop assistant to meet the proposed schedule.   25X1

3. We are in the process of hiring a part-time annuitant who should be available by June 1986. We need his services and expertise, however, for attendance at CAMS project contractor meetings to keep abreast of system changes affecting the training program, evaluation of CAMS course content to ensure that course materials reflect the current operational CAMS environment and user contact. He will have only limited involvement in classroom teaching in his area of expertise to help us in the classroom. We propose that COMIREX provide OTE with two part-time personnel, one instructor and one workshop assistant. The workshop assistant should be available during each of the proposed 11 runnings in FY 1987. The instructor should be available to serve in rotation with our two full-time instructors. Both the instructor and workshop assistant must be CAMS proficient. Not only would their involvement help us meet the schedule demand but, more importantly, they would bring a vital user perspective to the training.   25X1
